PROFESSIONAL SUMMARY

Aspiring Frontend Web Developer actively seeking internship or entry-level opportunities to gain real-world industry experience. Skilled in building responsive, user-friendly websites using HTML, CSS, JavaScript, React, Next.js, and Tailwind CSS. Gained practical experience in UI/UX design through the Digital Egypt Pioneers Initiative (DEPI), along with foundational backend development skills using Node.js, Express, MongoDB, and Mongoose. Passionate about building complete web applications and continuously expanding my full-stack capabilities in a professional environment.

EDUCATION

- **General Egyptian Secondary Education** *(Oct / 2020 - Jul / 2022)*
- **Bachelor's Degree in Chemistry and Zoology** *(Expected Graduation 2026)*
Zagazig University, Faculty of Science

SKILLS

- **Software Tools:** HTML | CSS | JavaScript | Tailwind CSS | React
- **Responsive Design:** Designing and developing layouts that adapt smoothly across different screen sizes and devices.
- **User Experience Design:** Enhancing usability, accessibility, and engagement through user-centered design.
- **Problem Solving:** Able to analyze and divide problems into smaller pieces to be able to find creative solutions to improve user experience and performance.
- **Attention To Details:** Ensuring pixel-perfect designs and high-quality code for a polished final product.
- **API Integration:** Connecting front end applications with external services or databases to fetch and send dynamic data, enabling interactive and real-time functionality.

Projects

SiteLab:

- Developed a modern, responsive landing page using HTML, CSS, and JavaScript
- Implemented a sleek UI design with smooth animations to enhance user experience
- Ensured cross-device compatibility for desktops, tablets, and mobile phones
- Focused on clean code structure, interactivity, and performance optimization
- Demonstrated strong front-end development skills and attention to detail in UX/UI

Cartify - eCommerce Platform (React):

- Built a dynamic eCommerce platform using React and React Router DOM
- Integrated FakeStoreAPI to simulate real product data
- Implemented core features like product browsing, cart management, and navigation
- Focused on creating a seamless user experience with smooth routing and responsive design
- Strengthened skills in component-based architecture and state management

Mersal - مرسال (Full-Stack Social Media App):

- Built a modern full-stack social media web app using the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Implemented core features: user authentication (JWT), post creation, user profiles, and profile editing
- Integrated i18next for seamless multi-language support (Arabic and English) with dynamic language switching
- Managed global state using Zustand, and handled API communication with Axios
- Designed a fully responsive and accessible UI using Tailwind CSS

FAMILIAR WITH

- **Version System Control (Git, GitHub):** Know some basic Git & GitHub features like initializing a new local repository, Pushing the local repository to GitHub, Creating and managing branches.
- **Basic Back End Concepts (RESTful APIs, Databases):** Have some basic knowledge in node.js and express framework.
- **SEO Best Practices For Web Development**

LANGUAGES

- **Arabic** (native)
- **English** (Conversational)
